The company was founded in 1936 starting with production of a combined assortment of military and civilian firearms. The first products were anti-aircraft machine guns, military pistols and smallbore rifles. The current line of Česká zbrojovka products includes sporting and hunting firearms as well as duty weapons for armed forces, police and other armed units. Common features of all firearms manufactured by Česká zbrojovka are their high quality standard, long-term reliability and accuracy.

Česká zbrojovka is today rated as one of the world’s biggest producers of firearms. More than 80 per cent of its production is exported to over one hundred countries worldwide. The first-rate properties and performance of its firearms give Česká zbrojovka its excellent reputation, in both domestic and international markets. Significant successes reached by CZ-team sport shooters, which traditionally achieve the highest awards at the highest level of competition only enhance our world renowned brand name. The purchase of state-of-the-art technologies together with more than seventy years of industrial production experience, outstanding workmanship and the skill of its employees enables this company to expand its activities to other branches of engineering, predominantly in the production of components designed for automobile and aircraft industry.

The Lux version of the CZ 452-2E ZKM rimfire rifle has a lacquered stock made from Turkish walnut featuring checkering located on the pistol grip. The tangent rear sight is adjustable for elevation and windage in the wide range of distances. The receiver has factory milled dovetail 11 mm (0.43 in.) wide for the rifle scope mount. This model comes with a 5 round magazine.
The rimfire rifles produced by Česká zbrojovka Uherský Brod due to their classical construction and unfailing reliability are ranked among the most sought-after long guns of their kind on the world market. Quality, long service life, accuracy and safe handling are the main virtues of these firearms intended for hunters and sports shooters.

Unparalleled accuracy is attained in all CZ rimfires models, besides other things, through the use of hammer forged barrels. This is not the cheapest or fastest way to build a barrel, but it is part of our “take the time to do it right” attitude. The barrel can be provided with the muzzle threaded for a Still or Parker-Hale sound suppressor attachment.

The receiver is made from a one billet of high-quality steel and is provided with milled dovetail to accommodate scope mount. The trigger of the CZ 452 rimfires line is adjustable by the user.

Quality and attention to details has made the CZ rimfire rifles a growing favourite among small game hunters and sport shooters. Available in both wide array of models and a wide range of prices we have a rimfire to meet any application.

**BESTSELLER**
The CZ 452-2E ZKM FS is based on the CZ 452-2E ZKM Lux model but of course having a stock of the full length made of Turkish walnut provided with checkering at grip parts. The CZ 452-2E ZKM FS comes with a 5 round magazine.

The Silhouette model was designed to meet the requirements for smallbore silhouette shooting competitions. This rimfire rifle features a sturdy synthetic stock and all metal surfaces are blued. It is made without open sights. The top of the receiver is fitted with an 11 mm dovetail groove for mounting a scope. The CZ 452-2E ZKM Silhouette comes with a 5 round magazine.

The Style model features a sturdy synthetic stock and matte nickel finish on all metal surfaces. Made without open sights, the top of the receiver is machined with an 11 mm dovetail groove for mounting a scope. These rimfire rifles come with a 5 round magazine. With the exception of the surface treatment, the Style model is identical to the Silhouette model.

.22 LR, .22 WMR, .17 HMR

Walnut stock

Synthetic stock

Luxurious Engraving Illustration
The Scout model is a compact rimfire rifle with a 12" length of pull (LOP) thus making it suitable for young shooters. Its shortened dimensions, reduced weight and single cartridge loading device make it a perfect first rifle for every boy or girl. The single cartridge loading device helps teach ammunition conservation and basic shooting skills. This rimfire rifle is fitted with open sights and an 11 mm wide dovetail groove for mounting optics. The Scout model can be used with any magazine available for the CZ 452-2E ZKM rimfire rifles line including a 5 round and 10 round version. These magazines are available as a separate accessory.

CZ 513 Farmer

The CZ 513 Farmer is a simplified version of the CZ 452-2E ZKM model. The stock made of beech wood is not provided with checkering. The barrel is hammer forged and fitted with iron sights. The CZ 513 Farmer features simplified and non-adjustable trigger. This rimfire rifle delivers legendary CZ accuracy and quality at a price everyone can afford. The new CZ 513 Farmer is an ideal choice for someone needing a high quality low cost .22 rifle.

The CZ 527 Lux is a traditional European style model featuring open sights and a Turkish walnut stock in the famous Bavarian pattern.
CZ 527, CZ 550

Centerfire rifles belong to Česká zbrojovka, Uherský Brod’s traditional products range. In the endeavour to meet the current requirements made in modern hunting and sporting firearms Česká zbrojovka’s designers have developed a diversified range of models fulfilling even the most exacting standards. The combination of time proven characteristics of the Mauser 98 type bolt action combined with modern manufacturing technologies and a professional approach by all the staff help to create reliable weapons with a long service life and excellent accuracy.

Professional Hunter Proficiency Exam in Zimbabwe tests the skills of the soon to be professional hunters (PH). According to Don Heath, Editor of African Hunter Magazine, the CZ is by far the most common make seen at the exam. The primary reason that these professionals rely on the CZ 550 rifles are because of this models reliability and accuracy and because the properties of these firearms are the one onto which the hunter’s life often depends.

CZ 527

The CZ 527 rifle line are precision repeating rifles designed for sporting and hunting shooting. This line of rifles has won more awards in the “light rifle” category in Europe than any other rifle... ever. Designed to fit the small base calibres perfectly, the CZ 527 is a true micro length Mauser style action, featuring controlled feeding of the cartridge, a detachable magazine and a hammer forged barrel. The trigger mechanism is of a single set design with an adjustable set trigger, on special order a single stage trigger can be supplied. The trigger itself is adjustable for pull weight and trigger travel. The two-position safety positively secures the rifle against unintentional discharge while simultaneously blocking the bolt in a closed position. The top of the receiver has milled dovetail grooves 16 mm wide to accommodate scope mounts.

• True micro length action
• Controlled feeding of cartridge
• Hammer forged barrel
• Single set trigger
• High degree of accuracy, reliability and long service life

F - fixed, ADJ - adjustable / HF - hammer forged, BR - broached
The CZ 527 American model features a classic American pattern stock, sporter-weight hammer forged barrel and a single set trigger. The barrel crowning is made with a special recess as applied to firearms used for target shooting. The CZ 527 American is supplied with 1" steel scope rings.

**CZ 527 LH AMERICAN**
The CZ 527 American version designed and made in the full configuration intended for left-hand users.

Optics and mount are not part of the product.

**CZ 527 EXCLUSIVE - EBONY EDITION**
The CZ 527 Exclusive represents a new generation of exclusive rifles made by CZ. The stock and pistol grip are of modern style made of luxury walnut tipped with ebony wood. The floating barrel made by the cold hammer forging technique is the key to long service life and outstanding accuracy. Barrel's beautifully faceted external surface is formed in the course of hammer forging process. The jewelled bolt has been polished to perfection providing extremely smooth operation. The magazine having a 3 round capacity is flush with the stock.
Substantially modified this CZ 527 rifle version is engineered for widely used .223 Rem cartridge having average muzzle velocity 1000 m/s. Barrel featuring 6 grooves having 12” rate of twist ensures high accuracy of fire. Completely new stock of American style and 3 round metal magazine not interfering with the stock contours guarantees high comfort of shooting. This rifle is designed to be used in adverse conditions.

The CZ 527 Varmint Laminated is a rifle made with highly resistant laminated wood stock. This model comes with a 24” hammer forged barrel.

The CZ 527 Varmint is designed for shooting at medium and longer distances. Good both for hunting and sport. This model is fitted with a 24” hammer forged barrel and a Turkish walnut stock.

The CZ 550 series rifles represent a new line of elegant, aesthetic and ergonomically designed firearms. For the sake of enhancing their accuracy and attaining a long service life these rifles are fitted with hammer forged barrels. The diversified range of CZ 550 models with their characteristics and elegant design solutions meet contemporary requirements as laid upon sporting and hunting weapons.

**CZ 550**

The CZ 550 Exclusive represents the next generation of rifles in .30-06 Sprg. cal. The barrelled action is made in glossy finish. The receiver features classic square bridge with dovetail for attachment of optics. The barrel external surfaces are spiral faceted caused by cold hammer forging process thus ensuring high accuracy and long service life. The stock and pistol grip from selected walnut are tipped with ebony.

**CZ 550 STANDARD**

The CZ 550 Standard is a primary version of the CZ 550 model line fitted with a walnut wood stock without cheekpiece.

**CZ 550 EXCLUSIVE**

The CZ 550 Exclusive represents the next generation of rifles in .30-06 Sprg. cal. The barrelled action is made in glossy finish. The receiver features classic square bridge with dovetail for attachment of optics. The barrel external surfaces are spiral faceted caused by cold hammer forging process thus ensuring high accuracy and long service life. The stock and pistol grip from selected walnut are tipped with ebony.
CZ 550

The rifles are provided with a compact trigger mechanism featuring a single-set trigger. The trigger can be adjusted for pull weight and travel. The set trigger can be easily dismantled without impairing its functional properties or adjustment of single stage trigger mechanism. The CZ 550 rifles are provided with a two or three position safety, which is disengaged in forward direction as standard. Stocks are fitted with sling swivels on a regular basis. The CZ 550 rifles are supplied with open adjustable sights or without sights accommodated to receive scope mounts. The CZ 550 rifles with open sights have the sights arranged in such a way so as not to interfere even with the riflescopes having the biggest tube diameter. All CZ 550's feature a classic square bridge receiver with a 19 mm dovetail milled right into the receiver for the mounting of optics.

Diversified range of calibres
Easy mounting of riflescope
Controls simple in operation and easy to reach
Completely adjustable trigger mechanism (be it with set trigger or without a set trigger)
Cocking indicator indicates cocking of striking mechanism
Easy disassembly for cleaning and routine maintenance
Long Mauser style claw extractor
Square bridge receiver
Hammer forged barrel
High accuracy, reliability and long service life

CZ 550 LUX

This model is fitted with a stock made of walnut wood with Bavarian style cheekpiece.

The CZ 555 represents a new elegant rifle as a continuance to the CZ 550 line. This rifle is provided with a short extractor and side magazine release. The stock made of high-grade walnut wood bears a new shape. The rifle is equipped with a two-position safety with a push-button unblocking of the bolt at the safe position and reinforced receiver with the bolt guide located in the groove for the right locking lug. The hammer forged barrel is free floating.

.30-06 Sprg., .308 Win., 7x64

CZ 550 MEDIUM LUX

The perfect choice for hunters who consider the weight to be an important parameter. With the weight less than 3.3 kg (7.28 pounds) this rifle is fitted with adjustable sights, single-set trigger and fixed or detachable magazine holding 3 cartridges.

.300 Win. Mag., .7mm Rem. Mag., 9.3x62

CZ 550 FS

Classical full stock made of walnut wood having steel muzzle cap and Bavarian style cheekpiece, furnished with checkering and ventilated rubber buttplate. The barrel length is slightly reduced measuring 520 mm (20.47 in.).

.243 Win., .308 Win., .270 Win., .7x64, 6.5x55 SE, 8x57 IS, .30-06 Sprg., 9.3x62

CZ 555

The CZ 555 represents a new elegant rifle as a continuance to the CZ 550 line. This rifle is provided with a short extractor and side magazine release. The stock made of high-grade walnut wood bears a new shape. The rifle is equipped with a two-position safety with a push-button unblocking of the bolt at the safe position and reinforced receiver with the bolt guide located in the groove for the right locking lug. The hammer forged barrel is free floating.

.30-06 Sprg., .308 Win., .7x64
Walnut wood stock of Monte Carlo type with raised comb provided with checkerings and rubber buttplate.

Barrel with a battue sight predisposes this firearm for hunting of moving game at shorter distances.

CZ 550 AMERICAN
This rifle features a classic American pattern stock with reduced drop at heel, 18 LPI checkering, sporter weight hammer forged barrel and a single-set trigger. This rifle is designed for aiming with optical sights only. The CZ 550 American is supplied with 1" steel scope rings.

CZ 550 VARMINT
Walnut wood stock without cheekpiece, with reduced drop at heel, furnished with checkering and ventilated rubber buttplate. Heavy hammer forged barrel together with the shape of stock predisposes this rifle for shooting with an optical aiming device only.

CZ 550 HUNTER
A new rifle developed on the basis of the CZ 550 model. This rifle model is primarily engineered for shooting at long distances having high accuracy of fire. The high precision of barrel is achieved by applying advanced manufacturing technologies to exacting standards. The stock is made from hand-picked walnut wood.

Optics and mount are not part of the product.

LUXURIOUS ENGRAVING ILLUSTRATION

BESTSELLER
The CZ 550 Varmin model with highly resistant laminated wood stock with reduced drop at heel, cheekpiece and with strengthened forend.

The CZ 750 S1 M1 Sport rifle represents the primary version of our repeating rifles range with Mauser-type bolt and heavy barrel designed for precise target shooting up to 800 m (875 yd.) distances. Single-set trigger mechanism is equipped with an adjustable set trigger as standard; a single stage trigger is supplied on special order. The trigger itself is adjustable for pull weight and trigger travel. The safety secures the rifle against unintentional discharge and at the same time blocks the bolt in closed position.

For the scope mount attachment the milled grooves located at the top of the receiver can be used or alternatively the Weaver rib made according to MIL-STD 1913 Standard specifically designed for the scope mount attachment. The CZ 750 S1 M1 rifle is equipped with an adjustable and very sturdy synthetic stock to be used under the most severe conditions. Rifles of the CZ 750 line are built for the bipod attachment.

Optics and mount are not part of the product.

BESTSELLER
The CZ 550 Safari Classics rifle model is designed for hunting of heavy and vital game. This model is engineered for legendary calibres used especially in African wilderness. The stock with a cheekpiece is of American style made of selected walnut. The wood figure and grain together with perfect craftsmanship applied to all parts and components complemented with jewelled bolt ranks this rifle among luxury firearms category.

.300 H&H Mag, .404 Jeffery, .450 Rigby, .500 Jeffery, .505 Gibbs

Cartridge pouch.

Combined pouch for knife and cartridges.

Safari Classics accessories could be supplied also in versions such as buffalo hide or suede.

Deluxe leather rifle sling.
Shotgun BO 801 is intended either for hunting or sport shooting. The barrels of 12 ga. caliber, with a length of 700 mm are equipped with the 70 mm or 76 mm chamber. This firearm can be optionally supplied with interchangeable shotgun barrels 700mm long or, there is a separate set with shotgun barrels. The shotgun has an automatic safety, ejector, and single trigger with selector. The stock and forend are made of walnut. The shotgun can be modified for skeet and trap. This model can be also adapted for a left-handed shooter.

12/12 Walnut stock
**.02 Bo 802**

Rifle – shotgun Bo 802 is intended for hunting purposes. The rifle barrel is 600 mm long and it is combined with a shot barrel of 12 ga. caliber, with the chamber of 70 mm or 76 mm. The weapon can be supplemented with interchangeable 700 mm shot barrels. This weapon has an automatic safety, extractor and two triggers – the front one is equipped with a trigger set. A left-hand version is also available.

**BO 803**

This weapon design is based on the rifle/shotgun BO 802 model featuring extractors and trigger mechanism having two trigger blades, the front one with a set-trigger. The interesting thing of the BO 803 O/U rifle are barrels which are not soldered together. Both barrels grouping is adjusted by the original system of collars. The scope instalment to dovetail using slid-on mount with a transverse element is for the BO 803 superposed rifles line a matter of course. In addition the BO 803 model can be also supplied as an interchangeable barrels bundle for the BO 802 O/U shotgun/rifle model.

8x57 JRS/8x57 JRS, .308 Win./.308 Win., .30-06 Sprg./.30-06 Sprg., 7x65 R/7x65 R, 9.3x74 R/9.3x74 R

**Brno Stopper**

The Brno Stopper represents the brand new over-under rifle chambered in powerful .458 Win. Mag. caliber designed for hunting of dangerous game. This firearm with automatic safety is for prompt shots equipped with a single trigger. The stock and fore-end are made from hand-picked walnut wood and provided with elegant checkering. This model can be also adapted for a left-handed shooter.

**.05 BRNO EFFECT**

Robust break-action breech lock outfitted with a wide wedge guarantees high durability. The firing mechanism is cocked while opening this rifle using top lever. The trigger assembly is located in the proper trigger mechanism. A finely tuned set-trigger provides light and crisp trigger pull. The rifle is disassembled by pressing down the slide plate sited at the fore-end. The barrel is provided with dovetail to accommodate scope mount.

**BRNO RIFLES**
Characteristic features of all versions of the CZ-USA shotguns are:
- favourable ergonomics
- the weapon is well balanced and consequently quick and easy to aim
- good results at instinctive shooting (without aiming)
- low trigger pull weight
- high accuracy of fire
- high reliability

**WOODCOCK**
The Woodcock comes standard with single selective trigger and auto ejectors. The Woodcock’s sculptured frame incorporates a side plate, thus resembling a true British side lock action.

**MALLARD**
The Mallard over-under shotgun comes standard with double triggers and extractors. The barrel is burnished and available in either 20ga. or 12ga.

**REDHEAD**
The Redhead comes with a single selective trigger and extractors. Coin finished receiver evokes classical look. The Redhead is available in 12ga. and 20ga. with screw-in chokes.

**RINGNECK**
The Ringneck is side-by-side with a single trigger. The stock and fore-end are hand checkered. The Ringneck includes 5 screw-in chokes.
.05 CANVASBACK

A single selective trigger and 5 screw-in chokes are standard equipment on the Canvasback. The receiver is made with black chrome finish. The stock is made of Turkish walnut with rounded pistol grip bottom.

.06 SPORTING

The CZ Sporting is the first shotgun from the CZ-USA specifically designed for sporting clays and FITASC competition. Hand engraving on the satin black finished receiver complements the nicely figured high-grade Circassian walnut stock. The CZ Sporting has a neutral cast stock with an adjustable stock, trap style fore-end, pistol grip and ambidextrous palm swells. Features that give the CZ sporting model the competitive edge are back-bored barrels with extended forcing cones, fully adjustable comb, single selective trigger and automatic ejectors.

.07 CZ 712

The CZ 712 is a gas operated semi-automatic firearm built on a light weight alloy receiver. This shotgun is newly complemented with the firing pin block which precludes the firing pin movement until the time the breech is closed and also with manual two-position safety at the inside of the trigger guard. The barrel exterior has moly black hard chrome finish that will resist corrosion after many seasons in the field. The CZ 712 comes with a magazine tube plug installed for waterfowl hunts. If the plug is removed, it gives hunter 4+1 capacity so preferable for upland.

PISTOLS

Česká zbrojovka Uherský Brod was founded back in 1936 and its 70 years of experience with small arms design and manufacture has led to many innovative pistol designs. From the latest models we can name the CZ 75 SP-01 – the handgun of the World Champion in shooting according to the rules of IPSC, Production Division and new CZ 75 P-07 DUTY. State-of-the-art technology, CNC machining centres and skilled personnel together with unparalleled know-how and the right attitude ensure that these designs leave the factory at the highest standards of quality, so typical for all the handguns of the CZ line.

CZ 75 P-07 DUTY

The CZ 75 P-07 Duty represents the new generation of the CZ pistols line. Newly engineered Omega trigger mechanism improves trigger travel and with the use of fewer parts enhances the service live of this model. However, the main advantage is really easy interchange of decocking lever or manual safety.

This pistol model can show off its original design and excellent and unerring grip with instant and intuitive target acquisition. Low-lying barrel axis together with the slide backstop on the material of the frame allows keeping perfect control over handgun even at very rapid shots fired one after another. Really extensive practical tests demonstrated not only excellent accuracy and reliability of this new pistol, but also extremely high resistance and durability of all parts of this handgun, which is further enhanced through nitriding of the barrel and slide.

The CZ 75 P-07 Duty has unlike the overwhelming majority of pistols of the CZ 75 family the barrel locked into the ejection port. Defining the barrel height and its axis centricity is secured by the protrusion located at the rear section of the locking block. The slide handling facilitates eight clean-cut grooves. The original shape of the slide results from bevelling of its upper lateral edges thus facilitating placing and withdrawing the handgun to and from holster. The slide carries sights, the front sight in longitudinal and the rear sight in transverse groove, with the sight radius extension made by elongating the rear sight visual area up to the rear edge of the slide. The integral part of the slide is of course also automatic firing pin block safety. Spent cartridge case extraction is provided by robust extractor placed on the right side of the slide. Ejection of cartridge case or any not discharged cartridge is facilitated by pretty large ejection port. The slide's recoil spring is made of rectangular profile wire. The Duty model basic disassembly is essentially the same as for the standard CZ 75, so there is no tool necessary. In case of need for more thorough cleaning the trigger and firing mechanism can also be easily and in effect almost completely disassembled.

The CZ 75 P-07 Duty pistol model ranked Česká zbrojovka a.s. among the absolute world leaders in design and manufacture of modern service pistols.

* Newly engineered trigger mechanism allows easy exchange from decocking mode pattern to manual safety (control levers are in the same direction – in front of axis)
* Pistol frame uses striations of particular pattern for making grip more secure and unerring
* The handgun can be supplied with a special loop preventing its stealing
* This pistol offers possibility to use an 18 round magazine
* MIL-STD-1913 rails for laser sighting device or light attachment
* Sights having decay light images for efficient aiming under poor visibility conditions
* Increased service life achieved by using nitrided barrel and slide (barrel locked into the ejection port)
* Beaver tail having a new contours enabling firm holding of the handgun
* Modified trigger guard design allowing shooting in gloved hands and firm holding with non-shooting hand Specially adapted slide shape facilitating quick draw of the pistol from holster
* There is an after-market option for this pistol in holsters of modular design with possibility to make up to 108 combinations

ADJ – adjustable, F – fixed, FSF – fixed, snag free
* without barrel ramp

SA – single action, DA – double action, DAO – double action only
ADJ– adjustable, F – fixed, FSF – fixed, snag free

Safety Stop on the Hammer - A half-cock safety notch on the hammer so as to prevent it from striking the firing pin when the hammer is manually cocked and a thumb could slip.

Firing Pin Safety – The firing pin safety keeps the firing pin blocked until the trigger is pulled. This safety device minimises the risk of accidental discharge through mishandling such as when a loaded pistol is dropped.

Decocking - Serves for the lowering of the hammer from the cocked position to the hammer safety notch. There is no necessity to manipulate the trigger and hammer manually. When the hammer is decoccked, the pistol is safe for all normal handling and yet is ready for immediate use.

Manual safety – Manual safety is applied by the user when putting the firearm on safe.

Magazine safety - Blocks the trigger mechanism unless the magazine is inserted into pistol frame.

** without barrel ramp
The CZ 2075 RAMI is a handgun from our „Subcompact“ category based on the proven CZ 75 pistol model design. The trigger mechanism operates in SA/DA mode of fire. The pistol utilizes several safety features including a firing pin block and a manual safety. Incorporating the CZ staggered column magazine design, the little CZ 2075 RAMI accommodates 10 cartridges of 9 mm Luger or 8 cartridges of .40 S&W cal. plus one in the chamber. With a 3” barrel weighs less than 700 g when unloaded.

CZ 92.05

The CZ 92 is designed for personal defence at short distances. The whole technical concept and safety features were especially adapted with this in mind. The CZ 92 pistol incorporates the blowback breech principle and the double action only (DAO) mode of fire. For enhancing safety this pistol is additionally outfitted with magazine safety so that removal of the magazine automatically blocks the trigger. The pistol comes now in new design with side magazine release.

The CZ 2075 RAMI P is additionally outfitted with an ambidextrous manual safety for better handling. Handgun cocking is made more easy due to the augmented grip portion of the slide. The CZ 2075 RAMI P is also available in the version adapted for less-lethal cartridge cal. 9 mm P.A. Rubber.

This handgun was a nominee in the prestigious Guns & Ammo magazine for the Gun of the Year 2004.

CZ 2075 RAMI

- Quality and reliability of the CZ 75 pistols line
- Length 168 mm, height 120 mm, width 32 mm
- Hammer forged barrels
- Barrel length 3”
- Weighs less than 700 g
- SA/DA mode of operation
- Manual safety
- Firing pin block
- Low profile, snag-free sights
- Magazine capacity 10+1 in 9mm cal., 8+1 in .40 S&W cal.
- Ideal handgun for concealed carry
CZ 75 COMPACT
Shortened version of the basic all-steel CZ 75 B with 3.9 in. long barrel.

CZ 83
The CZ 83 is a compact all-steel semi-automatic handgun designed on the blowback breech principle. The pistol is produced with barrel having classic rifling in calibers 7.65 mm Browning (.32 Auto) and 9 mm Browning Short (.380 ACP) and with polygonal barrel bore for the 9 mm Makarov cal. The trigger mechanism is a SA/DA type. This model features an ambidextrous manual safety and magazine catch. The CZ 83 is an ideal concealed carry pistol.

CZ 75 D COMPACT
This is a pistol with a light alloy frame having a decocking lever, featuring extended magazine release, snap-free sights, loaded chamber indicator, serrated front and back strap for improved handling, rubber grip panels and lanyard loop in the butt.

.06 CZ 75 COMPACT
New compact model has a steel frame and is equipped with an ambidextrous manual safety. The dust cover on the frame features the MIL-STD-1913 rails to accept tactical lights and lasers. With 10 + 1 cartridges magazine capacity is the CZ 75 COMPACT pistol in cal. .40 S&W an excellent choice for concealed carry or duty weapon.

.09 CZ 75 D COMPACT
This is a pistol with a light alloy frame having a decocking lever, featuring extended magazine release, snap-free sights, loaded chamber indicator, serrated front and back strap for improved handling, rubber grip panels and lanyard loop in the butt.
The CZ 75 D COMPACT based on the CZ 75 design, was after 3 years of some of the most aggressive and demanding tests enlisted as duty handgun of the Czech National Police. Rugged, extremely reliable and precisely balanced all-round the CZ 75 D COMPACT pistol is designed in such a way so as to meet conditions and situations required by modern and up to date law enforcement and as such meets all current requirements of police and military forces in the whole world. Low weight and dimensions predispose the CZ 75 D COMPACT pistol for personal defence and long term carry. According to evaluations from a number of police and military tenders the CZ 75 D COMPACT ranks among the best pistols of the world. The CZ 75 D COMPACT pistol being offered here is a handgun in compliance with strict demands and requirements according to NATO specifications.

- Pistol codified in accordance with NATO SPEC, NSN 1005-16-000-8619
- Lightweight attained by the use of forged aircraft grade aluminium alloy
- High reliability with various types of cartridges, including ammunition made according to “STANAG” standards
- Safety features such as decocking lever, hammer safety notch and firing pin block safety ensure safe handling in all situations
- Excellent ergonomics
- Re-contoured trigger for smoother, consistent and low weight trigger pulls
- Generous squared trigger guard for gloved hands shooting
- Checkered rubber grips, serrated front and back strap for superior handling
- Lanyard loop on butt
- Sights outfitted with a three-dot illuminating system for better aiming in poor visibility conditions
- Good results at instinctive shooting (without aiming)
- MIL-STD-1913 accessory rails to accept tactical lights and lasers
- Easy disassembly for cleaning
- Hammer forged barrel
- Long service life

Reliability:
The U.S. Army “Mean Rounds Between Failure” (MRBF) requirement is 485 rounds for 9mm pistol. During testing of the CZ D COMPACT, the average number of stoppages was only 7 per 15 000 rounds fired, this is 0.05% failure rate representing excellent MRBF rate of 2142 rounds!

ADJ – adjustable, F – fixed, FSF – fixed, snag free
* without barrel ramp
The CZ 75 B Ω is a pistol having new trigger mechanism. The parts of the new trigger mechanism were dramatically simplified as the production terms are concerned. The said parts are placed on the easily removable axes while utilizing interlocking features. Thanks to this disassembly and re-assembly becomes simple matter, which can be performed by anybody without the need for any tools. This consequently substantially simplifies thorough maintenance of handgun. The materials used, forming of parts and their functional interconnection together enhanced durability, operating life and reliability of the new trigger mechanism above practically qualifiable value.

CZ 75

- All-steel construction
- High capacity double-column magazine
- Hammer forged barrels
- Ergonomic shape of grip and controls
- Unparalleled accuracy
- 3 dot sighting system (Tritium sights available)
- Easy operation of controls
- Extended service life due to advanced design and superior materials
- High safety standard resulting from intrinsic safety features:
  - manual safety, or decocking
  - safety stop on hammer
  - firing pin block safety
  - out of battery disconnect

Cz 75

Česká zbrojovka Uherský Brod offers a great line of pistols stemming from the CZ 75 basic design. Individual versions differ in their calibre, size, weight, magazine capacity, trigger mechanism operation, safety elements, surface finish, frame material, grip panel types and other specific modifications and features.

"CZ 75 represents a significant step forward in autopistol design. In the thirty years since it first appeared, the CZ 75 has exerted an enormous influence on service pistol design, and it remains one of the best of the genre despite its age". Gene Gangarosa, Jr., Combat Handguns®, 2004.
**BESTSELLER**

**14 CZ 75 B STAINLESS, NEW EDITION**
The CZ 75 B STAINLESS is based on the classical CZ 75 B made in high-grade stainless steel thus enhancing its resistance against corrosion. Newly available also in the NEW EDITION version sand-blasted finish and ground ornaments on sides of the frame and slide.

![9 mm Luger](image1) Stainless steel

**15 CZ 75 BD**
The CZ 75 BD is based on the design of the CZ 75 B model. Standard manual safety is replaced with decocking lever, which serves for the easy and safe release of the hammer from the cocked position to the hammer safety notch. The pistol safety is further enhanced by the firing pin block safety enabling to carry this model with cartridge in the chamber and at the same time ready for immediate use.

![9 mm Luger](image2) Black polycoat

**16 CZ 75 BD POLICE**
The CZ 75 BD POLICE is equipped with decocking lever, loaded chamber indicator, reversible magazine catch, lanyard ring, checkered front and back strap of the grip and serrated trigger as standard.

![9 mm Luger](image3) Black polycoat

**17 CZ 85 B**
The CZ 85 B is ambidextrous version of the CZ 75 featuring ambidextrous manual safety and slide release.

CZ 75 SP-01

- Design based on the proven CZ 75 line of pistols
- Handgun intended for special units, suitable also for target shooting, hobby or self defence
- Long service life, accuracy and reliability even when used under adverse conditions
- Tritium sights for shooting in poor visibility
- MIL-STD-1913 accessory rails to accept tactical lights and lasers
- High stability and steadiness while shooting quick shots
- Front of trigger guard provided with serrations
- Front strap serrated for better grip
- Checkered rubber grip panels
- Enhanced magazine capacity holding 18 cartridges, CZ 75 standard magazines can be also used

Adam Tyc, member of Česká zbrojovka a.s., Shooting Team achieved with this handgun at the IPSC shooting events (Production Division) title of the World Champion (2005, 2008), the European Champion (2007) and he is also winner of Australian Games (2004, 2007).

CZ 75 SP-01 SHADOW

This model is specially adapted according to suggestions proposed by Angus Hobdell and Adam Tyc, CZ sport shooting team premier shooters. The CZ 75 SP-01 SHADOW features no firing pin block, which consequently reduces trigger pull weight and improves trigger travel properties. This pistol frame incorporates sport-oriented alterations such as recess beneath the trigger guard and beavertail enable higher grip of this handgun. Slightly “weaker” recoil spring facilitates loading of this handgun and enhances the shooting comfort. Gaping magazine well substantially improves reloading.

9 mm Luger Black polycoat
**.20 CZ 75 SP-01 TACTICAL**
The safety of the handgun is provided by firing pin block and decocking lever.

**.21 CZ 75 SP-01 PHANTOM**
The CZ 75 SP-01 PHANTOM is a variant of the CZ 75 SP-01 TACTICAL pistol. Thanks to its low weight achieved by the use of heavy-duty plastic this handgun suitable for armed forces and similar service. The interchangeable back strap section makes this handgun easy to configure for any hand size. The pistol is further outfitted with decocking lever.

.22 CZ 75 ADAPTER KADET
The CZ 75 KADET CONVERSION KIT is a separate accessory for the CZ 75/85 pistol series allowing shooting with .22 LR cal. cartridges. The CZ 75 KADET CONVERSION KIT features its own sights adjustable for elevation and windage, so the sighting-in of the pistol is not affected. Likewise other typical features of the CZ 75/85 pistol line are retained.

.22 LR Black polycoat

1. CZ 75 KADET CONVERSION KIT will fit all versions of the CZ 75/85 pistol line listed in this catalogue, except for the CZ 75 TACTICAL SPORTS pistol model.

.23 CZ 75 KADET
The CZ 75 Kadet in cal .22 LR is an excellent handgun for training or plinking, retaining all the characteristic features of the CZ 75/85 line of pistols.

.23 Polycoat

.24 SIMMUNITION
Special conversion kit for the CZ 75/85 D COMPACT intended for elite units close quarter combat training conducted at indoors environment.

SIMMUNITION ®, FX ®, CQT ® and SECURIBLANK ® are registered trademarks of General Dynamics Ordnance and Tactical Systems-Canada Inc.

*Simulated neuron firing only.*
.25 CZ 97 B

CZ 97 B is the first .45 cal. pistol made by CZ. It is operationally identical to the CZ 75 B (trigger mechanism operating in SA/DA mode, firing pin block, manual safety, hammer safety notch). The CZ 97 B has a staggered column magazine holding 10 cartridges and loaded chamber indicator.

- Calibre .45 ACP
- SA/DA mode of fire
- All steel construction
- Dual slide serrations
- Wood grip panels
- Extended beavertail
- Loaded chamber indicator
- Screw-in barrel bushing

.26 CZ 97 BD

This handgun is based on the CZ 97 B pistol model complemented with decocking lever. New feature are also rubber grip panels meaning a great improvement for a positive grip under adverse conditions. The CZ 97 BD pistol development has been pre-eminently specified for the service with specialized units in countries where .45AUTO cal. makes a prime choice.

- Calibre .45 ACP
- SA/DA mode of fire
- All steel construction
- Dual slide serrations
- Wood grip panels
- Extended beavertail
- Loaded chamber indicator
- Screw-in barrel bushing

The CZ 85 COMBAT pistol is revamped version of the CZ 75 model equipped with ambidextrous controls. This handgun is outfitted with adjustable sights as standard. The CZ 85 COMBAT is designed to be used at shooting competitions organized by armed forces, police units or law enforcement agencies.

The CZ 75 B SA stems from the classical CZ 75 B model differentiating from it by a single action trigger mechanism, which offers the sport oriented shooter together with reduced trigger pull weight also shortened trigger travel which makes it possible achieving the best shooting results ever.

The CZ 75 TS is built on the basis of requirements as proposed by members of the CZ Shooting Team, and for that reason it meets the highest demands for safety, accuracy, reliability and easy operation. This pistol model incorporates features, which form priorities for each action shooter. The CZ 75 TS is factory tuned in such a way that immediately after taking out of the box this handgun is ready for competition shooting at the highest level. Available is a wide assortment of sport accessories such as aluminium grip panels, aluminium magazine base, extended magazine funnel, or adjustable LPA rear sight.
The Dan Wesson Firearms 1911 Commander Bobtail is built around the innovative Ed Brown Bobtail carry feature. The abbreviated, curved mainspring housing makes the Commander 1911 size pistol a more discrete and comfortable carry companion with great control and fast pointing features. This pistol is fitted, hand polished and Master gunsmith built in the USA for decades of reliable service as a primary or back-up firearm. Available in .45 ACP & 10mm.

*45 ACP, 10 mm Stainless Steel

The Valor is a base stainless 1911 with our new „Duty“ coat matte black coating. This coating is a ceramic base coating that has set the standard for all coating tests. No polymer based coating can compare. Other features include forged frame with 25 LPI checkering and undercut trigger guard, adjustable defensive night sights, and Slime line VZ grips as well as all the other premium small parts you have come to expect from Dan Wesson.

*45 ACP black cladding

The Dan Wesson 1911 Commander Bobtail is built around the innovative Ed Brown Bobtail carry feature. The abbreviated, curved mainspring housing makes the Commander 1911 size pistol a more discrete and comfortable carry companion with great control and fast pointing features. This pistol is fitted, hand polished and Master gunsmith built in the USA for decades of reliable service as a primary or back-up firearm. Available in .45 ACP & 10mm.

*45 ACP, 10 mm Stainless Steel

The Dan Wesson PM-7 is a true rock solid, 70 series 1911 match pistol, developed with the competitive and casual target shooter in mind. Hand crafted by Master Gunsmiths in the USA, this pistol is built to outperform customer's expectations. The model 7 incorporates many name brand custom grade parts from manufacturers such as Ed Brown & STI, making the value packed Model 7 one of the best match pistols in its class. Available in .45 ACP, 10 mm & 9 mm Luger calibres or lately under SS Custom designation in .40 S&W calibre outfitted with optical fibre front sight and checkered black grip panels.

*45 ACP, 10 mm, .40 S&W, 9 mm Luger Stainless Steel

AIR GUNS

Characteristic features of air rifles:

- barrel in the closed position is pull bar latched
- automatic safety preventing unintentional discharge
- adjustable trigger pull
- all-steel sights adjustable for elevation and windage, tunnel front sight
- receiver tube provided with dovetail grooves for mounting a scope
- quality beech wood stock fitted with a low rubber buttplate

SLAVIA 630 STANDARD

The Slavia 630 break-barrel air rifle is intended for leisure time activities and basic training in sport shooting. The air rifle features a rear sight adjustable for elevation and windage and the trigger is provided with an adjustable trigger pull. The automatic safety secures the air rifle against any accidental discharge during cocking. The stock is made of beech wood and is designed in ambidextrous configuration.
**.02 SLAVIA 631 LUX**

The Slavia 631 break-barrel is intended for general sport shooting and to this purpose its design has been adjusted. The stock is made either from beech wood with a polyamide buttplate or plastic with an adjustable buttplate. The barrel is fixed in its idle position, the receiver is factory milled for a receiver sight or scope mount. The rear sight is adjustable for elevation and windage and the trigger pull weight is adjustable as well. Also this version is equipped with an automatic safety.

4.5 mm Beechwood stock

---

**.03 SLAVIA 634**

The Slavia 634 spring-piston air rifle with break-barrel cocking is designed for leisure time activities or basic sport shooting, or as the case may be pest control (where allowed). Except for the increased velocity inherent in this version all other properties of the Slavia 631 Lux in basic version are retained.

4.5 mm, 5.5 mm Beechwood stock

The CZ 200 PCP (precharged pneumatic) line of airguns is the result of close co-operation between Česká zbrojovka and a renowned English manufacturer of air guns. These guns involving a compact action/breech with a detachable compressed air reservoir are characterized with an excellent accuracy, consistence of projectile velocities, and minimum of felt recoil. Especially young and starting shooters appreciate these properties.

### PRE-ChARGED PNEUMATIC AIR GUNS

#### CZ 200 S.04

The primary version of the CZ 200 S model is made in calibre .177/4.5 mm or .22/5.5 mm and can be used beside sport purposes also for pest control (if allowed) as the muzzle energy can be set up to 16 Joule.

#### CZ 200 S FS.05

The full stock version of the CZ 200 S. This weapon retains all excellent features of the basic version complemented with more compact contours.

#### CZ 200 T.06

The target style CZ 200 T version having muzzle energy of 7.5 Joule is made in calibre 177/4.5 mm and is intended for very precise training and competition shooting. Design of this air rifle complies with ISSF rules.

ALL-PLASTIC HOLSTERS BY CZ

All-plastic holsters by CZ mean a great progress in the field of accessories for the firearms of the CZ brand. Thanks to the modular design it is possible to make up to 108 combinations of attachments and retention mechanisms in three bodies of different length (S, M, L), which can be easily set both for right and left side thereby ranking itself outright among the most universal carry systems. Configuration modifications can be easily carried out using included Allen wrench and package of alternative members. Carrying system is available in version designed for the new CZ 75 P-07 DUTY pistol.

Magazine pouches can be used for pistols models such as CZ 75 P-07 DUTY, CZ 75, CZ 75 SP-01 and CZ 75 TS. Listed pouches cannot be used for the CZ 97, CZ 92 and CZ 83. Retention strap can be used only for 16 round (9x19) magazines and 12 round .40S&W) magazines and those with lower capacity. For magazines holding 18 rounds (such as for the CZ 75 SP-01 Shadow) we recommend using open pouches.

The company was founded in 1936 starting with production of a combined assortment of military and civilian firearms. The first products were anti-aircraft machine guns, military pistols and smallbore rifles. The current line of Česká zbrojovka products includes sporting and hunting firearms as well as duty weapons for armed forces, police and other armed units. Common features of all firearms manufactured by Česká zbrojovka are their high quality standard, long-term reliability and accuracy. Česká zbrojovka is today rated as one of the world’s biggest producers of firearms. More than 80 per cent of its production is exported to over one hundred countries worldwide. The first-rate properties and performance of its firearms give Česká zbrojovka its excellent reputation, in both domestic and international markets. Significant successes reached by CZ-team sport shooters, which traditionally achieve the highest awards at the highest level of competition only enhance our world renowned brand name. The purchase of state-of-the-art technologies together with more than seventy years of industrial production experience, outstanding workmanship and the skill of its employees enables this company to expand its activities to other branches of engineering, predominantly in the production of components designed for automobile and aircraft industry.

PROLOGUE
Česká zbrojovka a.s.

The Company, reserves the right to make any changes it thinks necessary to improve its models or to meet any requirements of manufacturing or commercial nature.

ABOUT OUR WEBSITE
Feel free to browse through our website at www.czub.cz and take a virtual look at our catalogue. This is where you can find existing and new products, luxuriously engraved firearms, accessories, representatives responsible for individual regions, shooting competition events and presentations where you can see CZ products in action. This website offers also download of instruction manuals and many other useful information...
